1. Use Case 1 - Making/Canceling/Changing an Appointment

Test Case ID	TC01 - Successfully Canceling an Appointment
Test Objective	**Verify if the user can successfully cancel an appointment.**
Preconditions	The user needs to logged into the system & need to have an existing appointment
Test steps	1. Navigate to the "My Appointments" section. 2. Select the appointment to cancel. 3. Click on the "Cancel" button. 4. Confirm cancellation when prompted.
Input Values	Appointment Details (ID: 0000000001)
Expected results	Appointment is removed from the user's schedule. Users receive the confirmation of successful cancellation.

Test Case ID	TC02 - Making Invalid Change to Appointment - Date/Time
Test Objective	**A user should not be able to provide an invalid date/time to the application.**
Preconditions	The user must already have a valid appointment on the application that they can access.
Test steps	1. Navigate to the "My Appointments" Section 2. Select the Appointment to Edit 3. Change the Date and Time the appointment will occur. 4. Select "Confirm Edit"
Input Values	Appointment Details (ID: 0000000001, Date: 09/20/24, Time: 12:25PM)
Expected results	The application rejects the edit and alerts the user about the error.

Test Case ID	TC03 - Making Invalid Change to Appointment - Location
Test Objective	**A user should not be able to provide an invalid location to the application where there is no hospital.**
Preconditions	The user must already have a valid appointment on the application that they can access

Test steps	1. Navigate to the "My Appointments" Section
	2. Select the Appointment to Edit
	3. Change the Location the appointment will occur.
	4. Select "Confirm Edit"
Input Values	Appointment Details (ID: 0000000001, Location: California)
Expected results	The application rejects the edit and alerts the user about the error.

Test Case ID	**TC04 - Successfully Make an Appointment**
Test Objective	**A user should be able to successfully make an appointment, filling out all the fields with information.**
Preconditions	The user must have access to the application.
Test steps	1. Navigate to the "My Appointments" Section
	2. Select "New Appointment"
	3. Fill out all possible appointment details.
	4. Select "Confirm Appointment"
Input Values	Appointment Details (ID: 0000000001, Location: Richmond, Doctor: Dr. Doom, Date: 03/25/25, Time: 3:00PM, Reason for Visit: Regular Checkup + psychiatric therapy)
Expected results	Appointment is added to the user profile. The user receives a confirmation email about their appointment.
